

Morphology

Part 2: Rules of Word Formation

Outline of the Presentation

- Rules of Word Formation
 - Derivational Morphology
 - Inflectional Morphology
 - The Hierarchical Structure of Words
 - Rule Productivity
 - Exceptions and Suppletions
 - Lexical Gaps

Rules of Word Formation

the ways in which new words are made on the basis of other words or morphemes

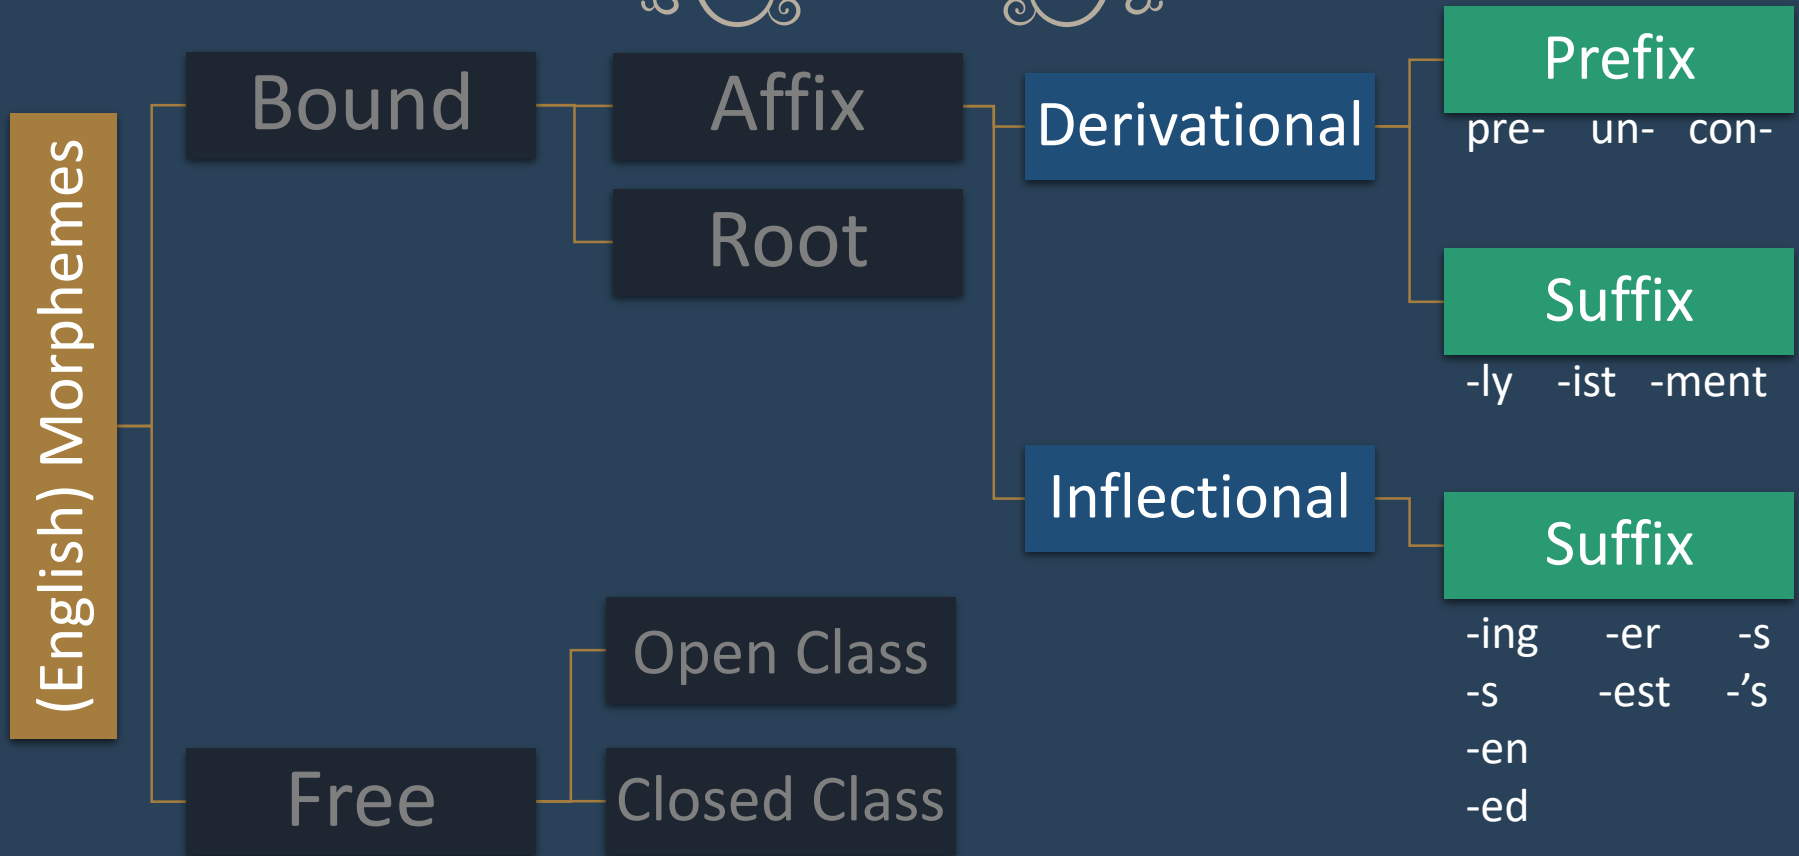

Rules of Word Formation

- Adjective + -ify → Verb 'to make adjective'
- Verb + -cation → Noun 'the process of making Adjective'

e.g. ugly → **adjective**
uglify → **verb**
uglification → **noun**

Rules of Word Formation

Derivational Morphology

Derived Words

Derivational Morphology

- Derivational morphemes, when added to the root, change either the category or the meaning of the word.
- e.g. employ → employer
- Both category and meaning has changed.

Attention!

- Derivational morphemes may or may not change the syntactic category of words.
- Derivational Morphemes: Suffixes & Prefixes.
- Inflectional Morphemes: only Suffixes

Some Examples

- boy + -ish → Noun to Adjective
- king + -dom → Noun to Noun
- un- + do → Verb to Verb
- a- + moral → Adjective to Adjective

More Examples

| Syntactic Role | Root | Notes |
|---------------------------------------|---------------------|--|
| Noun to Adjective | book + -ish | <ul style="list-style-type: none"> Derivational Morphemes All suffixes Syntactic category changed |
| | fam(e) + -ous | |
| | Victor(y) + -ian | |
| | picture(e) + -esque | |
| | affection + -ate | |
| | health + -ful | |
| | alcohol + -ic | |
| | beaut(y) + -ful | |
| | Elizabeth + -an | |

More Examples

| Syntactic Role | Root | Notes |

| | red + -like | |
| | a- + moral | |
| | il- + legal | |
| | un- + happy | |
| | dis- + agreeable | |

Classes of Derivational Affixes

1ST CLASS

The addition of a suffix triggers subtle changes in pronunciation.

-ity, -an, -y, -ive, -ize

specific/specificity,
sane/sanity,
deduce/deductive,
critic/criticize

2ND CLASS

No changes in the pronunciation.

-er, -ful, -ish, -less, -ly, -ness

baker, wishful,
boyish, needless,
sanely, fullness

Attention!

- Affixes from the first class cannot be attached to a base containing an affix from the second class:

~~need+less+ity,~~

~~moral+ize+ive~~

- Affixes from the second class may attach to bases with either kind of affix:

need+less+ness

moral+iz(e)+er

Inflectional Morphology

Inflectional Morphemes

Inflectional Morphology

- Inflectional morphemes mark properties such as tense, number, person, etcetera.
- They never change the syntactic category of the stems to which they are attached.
- They are all suffixes (English).
- There are only 8 inflectional morphemes.

Inflectional Morphology

English Inflectional Morphemes

| | | |
|------|---|--|
| -s | 3 rd person singular present | He sleeps s at home. |
| -ed | past tense | She waited ed at home. |
| -ing | progressive | It is eating ing the dog food. |
| -en | past participle | Yusuf has eaten en the meal. |
| -s | plural | She made lots of cakes s . |
| -'s | possessive | Meghan' s eyes are blue. |
| -er | comparative | Lisa has shorter er hair than Nina. |
| -est | superlative | Mila has the coolest est outfit. |

Inflectional Morphology

- Inflectional morphemes, in English, follow the derivational morphemes.

commit + ment + s

~~commit + s + ment~~

Inflectional Morphology

- Inflectional morphemes are productive.
- They apply freely to nearly every appropriate base (except irregular forms such as feet, not foots).
- e.g. cats, dogs, cars, etc.

Inflectional vs. Derivational

Inflectional

Grammatical function

No word class change

Small/no meaning change

Often req. grammar rules

Follow deriv. morphemes

Productive

Derivational

Lexical function

Word class change

Meaning change

Requires no grammar rules

Precede infl. Morphemes

Almost nonproductive

Hierarchical Structure of Words

Tree Diagrams

Tree Diagrams

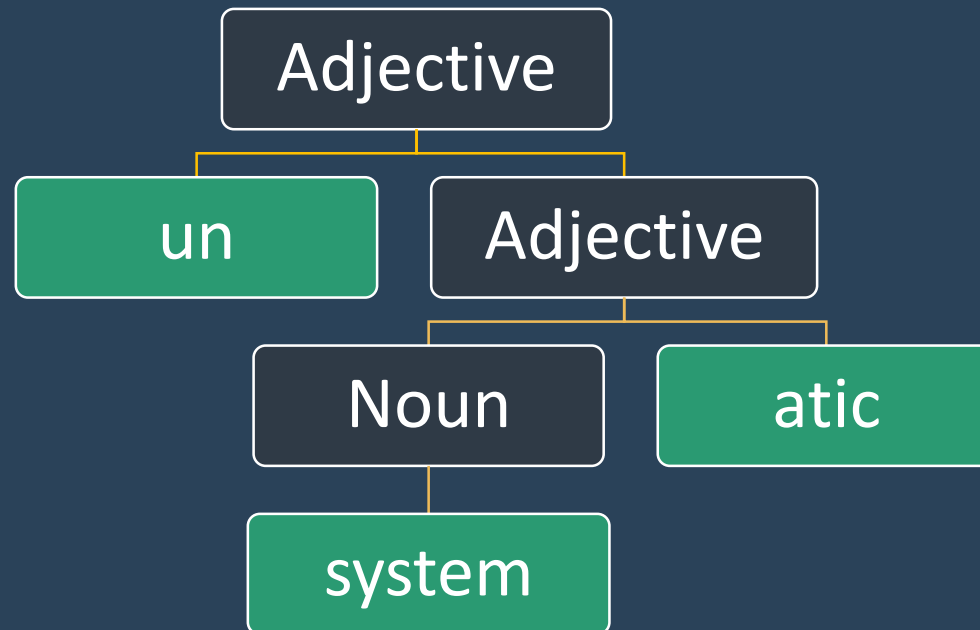

- Morphemes are added in a fixed order.
- This order reflects the hierarchical structure of the word.
- A word has an internal structure of morphemes.

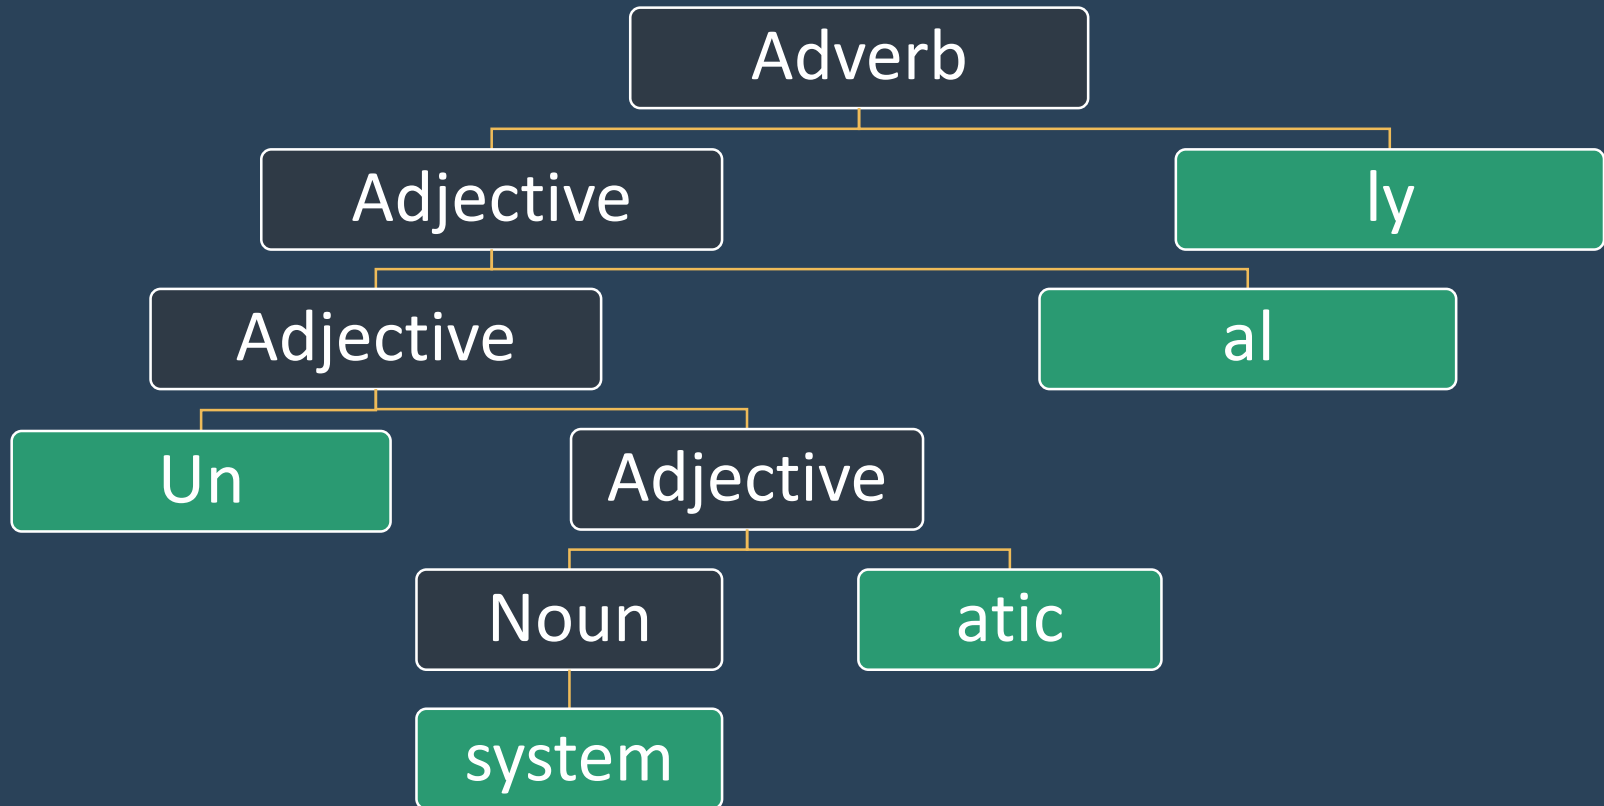

Tree Diagrams

- e.g. un+system+atic → 3 morphemes.

Tree Diagrams

Rule Productivity

Exceptions, Suppletions and Lexical Gaps

Rule Productivity

- Productivity refers to morphological rules that can be freely used to form new words.
- Inflections are mostly productive.
- Derivations are rarely productive.
 - Some of them: -able, -un.
 - accept+able, adapt+able, change+able
 - un+believe+able, un+pick+up+able

Exceptions

- The morphological rule that forms plural nouns from singular nouns does not apply to some words like child, man, foot, and mouse.
- Verbs like go, sing, bring, run, and know are exceptions.

child

~~childs~~

children

man

~~mans~~

men

go

~~goed~~

went

Suppletions

- Suppletion is a minor inflection technique where we change the morpheme instead of adding an affix.
 - 1. Total Suppletion
 - bad → worse, good → better, go → went, is → was
 - 2. Partial Suppletion
 - was → were, teach → taught

Lexical Gaps

- Words that conform to the rules of word formation but are not truly part of the vocabulary are called **accidental gaps** or **lexical gaps**.

e.g. clunt spleek flig slarm

Questions

Study Questions

Question #1

A learner of English says “I feel exciting about the movie.” instead of saying “I feel excited about the movie.” This is a learner error.

If a researcher wanted to study this mistake/error, which subfield of linguistics s/he would be dealing with?

a) Phonology

b) Morphology

c) Syntax

d) Pragmatics

e) Semantics

Question #2

Which of the following morphemes can be both inflectional and derivational according to the sentence the word is used in?

- a) -ment as in development
- b) -s as in books
- c) -tive as in productive
- d) -ing as in talking**
- e) -es as in goes

Question #3

The words employee, interviewee or referee are complex words that are composed of two morphemes. The morpheme -ee gives the meaning of a person who is not the “doer” of the action but the one who is affected / who is the object of the action. The morpheme -ee is _____.

Choose the alternative that best completes the paragraph above.

- a) inflectional
- b) closed class
- c) free
- d) derivational
- e) open class

Question #4

Which of the following is true about affixation in English?

- a) All derivational morphemes change the part of speech of the word.
- b) Inflectional morphemes are more productive than derivational ones.**
- c) Some inflectional morphemes change the part of speech of the word.
- d) There are few inflectional or derivational circumfixes or infixes.
- e) Derivational morphemes can be bound or free morphemes.

Question #5

Which of the following is true about prefixes?

- a) They are utilized for derivational purposes.
- b) They follow suffixes.
- c) They follow the base morpheme.
- d) They do not have any function.
- e) They are used for inflectional purposes.
